

# Oxygen Updater Privacy Policy and legal information

*Last updated: 4th September, 2020. Last version: 4.1.0*

Your privacy is important to the team of Oxygen Updater. However, some user data needs to be collected to maintain the quality of service for this application, to provide support and in order to use the application.

## Which personal information is collected?

The app itself only collects your current operating system version during use. If an error occurs, some additional - non-personal - information will be collected. Also, some of the services which the app uses collect personal information. These services include:

- **IP-address:** This is a very essential part of personal information that we must collect. Without collecting your IP-address, you will not be able to make a connection to our back-end and thus we will not be able to provide you this service.

- **Firebase (Analytics, Ads and Cloud Messaging):** Firebase is used to show ads and to deliver push notifications. Firebase Cloud Messaging stores an unique token of your device (Instance ID) in order to send push notifications. This token is kept during the lifetime of the application and will (currently) not get removed. Firebase Ads uses your per-device ad token to show relevant ads. See the Firebase privacy policies for more information: [Google Ads](#), [Firebase Analytics](#).

- **Google Play In-App Billing:** Used when you purchase the ad-free version. If you purchase the ad-free version, your personal details are stored by Google, but are not fully visible to the developer of the app. Visible details will not be used other than for refunding a purchase. For more information, visit the privacy policy of the Google Play Store: [Google Play Terms of Service](#) . By using the Google Play Store, you agree to the terms and conditions as stated in the Google Play Terms of Service.

- **Crash-logs:** Whenever a crash or an abnormal situation (failure to connect to server, error parsing data etc.) occurs, Oxygen Updater will send a Log Report to the Application Server. Crash reports do not include personal information. They only contain information about your selected device and update method, as well as your operating system version and the actual error message.

- **Contributing:** Since version 4.0.0

(<https://github.com/oxygen-updater/oxygen-updater/commit/884766371e62969831f2933ba790bbec4c2c1613>) the Contributor-option is now, by default opt-out instead of opt-in (see: <https://github.com/oxygen-updater/oxygen-updater/commit/86dc2f63c0e4e71859ad602f4ef817118cd31711>). We have done this, so that we get files submitted way quicker, which results in you getting updates faster after OnePlus makes them available. **Only** the .ota-directory on your phone gets scanned once per 15 minutes. It only checks for a specific name in that particular folder.

- **Email address:** When you send us an email at [support@oxygenupdater.com](mailto:support@oxygenupdater.com), your email address will be known to the Oxygen Updater team in order to reply back about your inquiry. We will never use your email address for other purposes than to provide you our support.

## How can I decide which information is collected?

- **Firebase (Analytics, Ads and Cloud Messaging):** You cannot decide which other information gets collected, as you will either see ads (for which Firebase may collect personal information) or have to buy the ad-free version (in which Google In-App-Billing stores your personal information).
- **Error logging:** The error logging feature can be turned off in the settings screen of the app, named 'Share usage data and logs'. If you turn off this option, no error logging will take place nor be send to the Oxygen Updater-servers.
- **Push-notifications:** You can turn off the push notifications in the settings screen of the app. This only affects the displaying of the notifications. Your device will still be registered with Firebase to support receiving push notifications. This might be changed in a future version of the app. *As of writing, the latest version of the app is 4.4.0.*
- **Personal ads:** You can select to opt-out of personal ads at <https://adssettings.google.com/authenticated>.
- **Contributing:** If you do not want to contribute, you can turn off this option at any moment you would like, anytime. To do this, head to the settings of the app.

## Legal information

The Application is not an official application from OnePlus or OPPO. You agree to use the Application at your own risk. The Developer of the Application is not responsible for any damage done to your device, your computer or any other property.

We cannot promise you, as a user, to always update you when this Privacy Policy has changed. You can check the most recent version here: <https://oxygenupdater.com/legal> or here: <https://github.com/oxygen-updater/oxygen-updater-backend>. Important changes will be posted in the news-section of the app.

OnePlus, and OPPO are the legal owners of OxygenOS. Visit <https://oneplus.com/about-us> to view information about OnePlus.

Android is a registered trademark of Google Inc. Visit <https://www.android.com/> for more information about Android.

Google Play and the Google Play logo are registered trademarks of Google Inc.

## Open Source content

This app uses the following open-source third-party add-ons:

- Joda Time: <http://www.joda.org/joda-time/>
- Jackson JSON processor: <https://github.com/FasterXML/jackson>
- Android Action Bar Style Generator: <https://jgilfelt.github.io/android-actionbarstylegenerator/>
- Android asset studio: <https://romannurik.github.io/AndroidAssetStudio/>
- RetroLambda and StreamSupport

All licenses of open source content apply.

## Artwork / images

All the copyrighted content is owned by their respective owner. Images in the News section are credited on a per-image basis.

## **Revision history:**

2020/09/04: Added information regarding the processing of IP-addresses. Changed wording of the Contribution-option, which is opt-out since 4.0.0. Added information when a user sends an email to the Oxygen Updater team. Changed OnePlus' URL as they now use dot com. Added version number of Privacy Policy to easier distinguish if changes have been made. Changed current version number of the app. Changed informal wordings.

2019/07/02: Added information about the opt-in for contributing to Oxygen Updater. Reworked the lay-out so everything is more clear and easier to read. Added and replaced information in 'legal'. Reworked 'Artwork / images' section.

2018/05/26: Cleared up privacy policy. Added more information about Firebase and In app billing.

2017/04/23: Textual improvements

2017/04/03: Added information about data collected in error logs

2016/07/25: Initial revision
